Computer Laboratory
University of Cambridge
JJ Thomson Avenue
Cambridge CB3 0FD
United Kingdom

Academic Experience

- | | |
|--------------|--|
| 2017–present | Research Associate at University of Cambridge
I am a Research Associate in the Digital Technology Group. I work on the applications of digital provenance. My work is funded from industry donations and I am involved in a DARPA grant. |
| 2016–2017 | Postdoctoral Fellow at Harvard University
I was a Postdoctoral Fellow at the Center for Research on Computation and Society. I worked on grant NSF SSI-1450277 <i>Collaborative Research: Bringing End-to-End Provenance to Scientists</i> and NSF ACI-1448123 <i>Citation++: Data Citation, Provenance, and Documentation</i> . |
| 2013–2016 | Graduate Research Assistant at University of Cambridge
I worked as a research assistant under the EPSRC EP/K011510 CloudSafetyNet grant. |

Education

- | | |
|-------------|---|
| 2012–2016 | PhD in Computer Science
Dissertation: <i>“Towards practical information flow control and audit”</i>
University of Cambridge, United Kingdom |
| 2011–2012 | MPhil in Computer Science
Distinction
Dissertation: <i>“Prevention of Identity Inference in De-Identified Medical Records”</i>
University of Cambridge, United Kingdom. |
| 2008 – 2011 | Diplôme d’Ingénieur in Software R&D
Examining comity praise (Félicitation du jury)
Institut Supérieur d’Électronique de Paris, France |
| 2006 – 2008 | Diplôme Universitaire de Technologie in EEE
Examining comity praise (Félicitation du jury)
Conservatoire National des Arts et Métiers, France |

Teaching Experience

2018-present	Operating Systems at University of Cambridge I supervised the Part IA (first year undergraduate) Operating Systems course.
2017-present	Undergraduate Mentorship at University of Cambridge I mentored Part II (final year undergraduate) students projects.
2016-2017	Graduate Mentorship at Harvard University I mentored PhD students, these interactions led to several publications.
2016-2017	Undergraduate Mentorship at Harvard University I mentored undergraduate students research projects and internships.
2016	Operating Systems at University of Cambridge I supervised the Part IA (first year undergraduate) Operating Systems course.
2012–2016	Concurrent and Distributed Systems at University of Cambridge I supervised the Part IB (second year undergraduate) Concurrent and Distributed Systems course.
2013–2016	GCSE, A-level in Computing at Cambridge Centre for Sixth-form Studies I was a teacher in a high-school where I taught students aged 15-19 preparing GCSE, As-level and A-level Computer Science.

Industry Experience

2012	R&D Software Engineer at Public Health England , Cambridge I worked on building a secure prototype web portal to allow brain tumour patients and their carers to access medical records online.
2008–2011	R&D Software Engineer at Gemalto, Paris I worked in Gemalto’s main R&D department on smartcard-backed online identity, in use cases for government agencies, an international Telecom company and a large UK bank. I also participated in the development of a debugging tool for remote e-passport application for the Australian government.
2006–2008	R&D Electronic Engineer at SRETT, Paris I started as an electronic engineer building and designing a prototype for a wireless sensor network. My job scope quickly moved to embedded software engineering for micro-controllers. I also designed and programmed an automated “out of factory” test bench for medical wireless sensors.

Fellowships

2018 - present	Research Fellow St Edmund’s College, University of Cambridge
2016 - 2017	Postdoctoral Fellow Center for Research on Computation and Society, Harvard University

Research Projects

2018–present	EPSRC DataBox Databox is a collaboration between Imperial College London, the University of Cambridge and the University of Nottingham. This project explore the development of the Databox as means of enhancing accountability and giving individuals control over the use of their personal data.
2016–present	NSF End-to-end Provenance End-to-end Provenance is a collaboration between the Harvard School of Engineering and Applied Science, and Harvard Forest. The project aims to leverage provenance tools to help the reproduction and authentication of scientific results.
2016–2017	NSF Citation++ Citation++ is a collaboration between the Harvard School of Engineering and Applied Science, and Harvard Institute for Quantitative Social Science. The project aims to integrate provenance support in the <i>dataverse</i> open-source data repository platform developed at Harvard and used by more than 25 academic institutions around the world.
2014–present	Microsoft Cloud Computing Research Centre (MCCRC) The Microsoft Cloud Computing Research Centre (MCCRC) is a virtual research centre in which technology lawyers and computer scientists are working collaboratively on research challenges in cloud computing where technology and regulation intersect. This collaboration involves the Cloud Legal Project at the Centre for Commercial Law Studies, Queen Mary University of London and the University of Cambridge Computer Laboratory.
2013–2016	EPSRC CloudSafetyNet CloudSafetyNet is a collaboration between the University of Cambridge, Computer Laboratory and Imperial College London, Department of Computing. The project aims to rethink fundamentally how Platform-as-a-Service (PaaS) clouds should handle security by exploring the use of Information Flow Control.
2008–2011	Federation des Cercles de Confiance (FC2) FC2 is a French government founded research project around digital identity, smartcards and online payments. It involved industrial (Gemalto, Orange, Atos, EADS) and academic (Conservatoire National des Arts et Métiers, ENSI Caen, Telecom Paris-Sud) partners. Applications ranged from a secure login for police officers, online payments and registration to government services (schools, local government social actions).

Invited Talks

08 Jan 2018 | **Towards practical whole-system provenance**, University of Edinburgh
Institute for Computing Systems Architecture Colloquium

Service

Program committee

2018	IEEE International Workshop on Legal and Technical Issues in Cloud Computing and the Internet of Things
2017	USENIX Workshop on Theory and Practices of Provenance
2017	ACM Workshop on Middleware and Applications for the Internet of Things
2017	IEEE International Workshop on Legal and Technical Issues in Cloud Computing and the Internet of Things
2017	ACM International Workshop on Mashups of Things and APIs
2016	IEEE International Workshop on Legal and Technical Issues in Cloud Computing and the Internet of Things
2016	ACM International Workshop on Mashups of Things and APIs

Organizing Committee

2018	Provenance-based Security Workshop
2017	IEEE International Conference on Cloud Engineering
